#### **DETAILED ACTION**

## Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).
- 2. The specification is objected by Examiner. It should have rewritten following the suggested layout including headings.

Application/Control Number: 09/335,608

Art Unit: 2663

## Claim Objections

3. Claim 6 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

#### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 5,818,871 to Blakeney, II et al..

Regarding to claims 1, 2, 6, and 7, Blakeney, II et al. disclose a communication system for transmitting real-time and non-real-time data packet comprising:

A first communication station 4 with a first transceiver; and a second communication station 6 with a second transceiver (Fig. 1, 2; col. 8, lines 39, and 40) having dual mode channel for communication real-time and non-real time packet data (Col. 11, lines 10-14);

· Application/Control Number: 09/335,608

Art Unit: 2663

The first station comprises a controller 40, 48 for generating output data stream comprising real-time data (Fig. 3; col. 5, line 62-col. 6, line 5); the controller also allocates non-real-time data when the real-time data (speech) is less than the full data capacity of the dual mode channel (Fig. 2; col. 9, lines 7-15; col. 11, lines 27-51).

Regarding to claims 3, and 8, Blakeney, II et al. disclose a speech coding system (42) for preparing the speech data for transmission (Fig. 2; col. 27-29). Furthermore, for inserting non-real-time data when the speech data rate lower than a predetermined value as taught by Blakeney, II et al., the controller 40, 48 needs an indication from the coding system 42 informing when the speech data is interrupted or reduced. Therefore, it is inherent that the controller in the system taught by Blakeney, II et al. receives timing information from the speech coding system indicating the timing of interruptions in the speech data.

Regarding to claims 4, and 9, Blakeney, II et al. disclose the first transceiver comprises a buffer for storing non-real-time data for transmission during reductions in the data rate of the real-time data (Col. 11, lines 34-39).

Regarding to claim 5, Blakeney, II et al. disclose the first station comprises a mobile station and the second station comprises a base station. However, for providing services as described by Blakeney, II et al., both the base station and the mobile station must comprise similar components that perform the same function. In the other words, the first station and the second station are interchangeable.

Regarding to claims 10, and 11, Blakeney, II et al. disclose the data stream resides in a single channel and comprises real-time data and non-real-time packet data (Col. 11, lines 27-29).

Art Unit: 2663

### Response to Arguments

6. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

#### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhat Do whose telephone number is (703) 305-5743. The examiner can normally be reached on 8:30 AM - 5:30 PM Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on (703) 308-5340. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-6743 for regular communications and 703-308-6743 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
